COUNCIL ONLY

Document ID: AD-Protocol-003
Classification: Council Only(CL-5)

1.Anomalous Contact Protocol

1.1 Purpose
To define the conditions under which O5 Council members may deploy/use anomalous assets(SCPs).

1.2 Anomalous Asset Authorization
O5 Council members may use/deploy anomalous assets **only** under the following scenarios.

- **Global K-Class Scenarios (XK/CK-Class)**
  - Permitted SCPs: Causality-altering anomalies. (SCP-2000,SCP-579 etc.)
  - Requires unanimous anonymous vote by the full Council. (≥80% approval)

- **Full Compromise of Foundation Primary Facilities**
  - Permitted SCPs: Population reconstruction anomalies.
  - Requires joint authorization by at least half O5 members.

- **Situations that directly pose a threat to the safety of members of the council**
  - Permitted SCPs: Therapeutic anomalies. (SCP-500, SCP-006 etc.)
  - The use of SCP-500 requires the consent of other council members.

- **Other SCPs that could be beneficial to the Foundation's future operations.**
  (SCP-411 etc.)

1.3 Prohibited Anomalous Assets

The following anomalies are **strictly forbidden** for any form of contact by O5 Council members.

- **Hazardous SCPs**
  - Examples: SCP-035, SCP-409, SCP-008, SCP-1025 etc.
  - Exposure to such SCPs poses a direct threat to the lives of council personnel.

- **Cognitohazard SCPs**
  - Examples: SCP-096, SCP-2316, SCP-2662 etc.
  - Such SCPs can cause anomalies even when they are not interacted with, and as such, members of the Council are forbidden to approach them.

- **Spatial Anomalous SCPs**
  - Examples: SCP-004, SCP-970, SCP-1734 etc.
  - Entering such SCPs may result in disorientation and eventually disappearance, and as such, council personnel are forbidden to enter such SCPs.

- **Other SCPs that may be threatening**
  - Examples:
    - SCP-294 and Its Outputs.
    - SCP-914 and Its Outputs.
    - SCP-1162.
    - SCP-055.
    - Other SCPs with Unknown Results.
  - All the breached SCPs should be considered extremely threatening.

2.Emergency Evacuation Protocol

2.1 Purpose
Due to the importance of council members to the Foundation, evacuation is to be carried out in the event of a danger to the facilities of council members, as explained here.

2.2 Conditions
Emergency evacuation should be carried out when the following conditions are met.

- Facility under external assault.
- internal CDC insurrection.
- Site containment breach.
- Other situations cause or possibly cause harm to council members.

2.3 Evacuation process
Once any of the above conditions have been met, the evacuation process should begin immediately.

- Phase 1
In the first phase, members of the council will be escorted by A-1 to the emergency evacuation point, usually a helipad, via the safest and fastest route, and then wait for evacuation.

- Phase 2
In the second phase, personnel will evacuate from the facility by helicopter.

  After that.The evacuation mission is completed.

2.4 Other regulations

2.4.1

　　During the evacuation process, the O5 evacuation route should be cleared of alert. and set up a blockade line. Anyone who crosses the blockade line shall be terminated.

2.4.2

　　During the evacuation, the Site CCTV system on the O5 evacuation route should be switched off or taken over by O5 Command.

2.4.3

　　If all routes to the helipad are unsafe before the evacuation begins. Priority will be given to evacuating O5 to a shelter in the site, and the evacuation procedure will continue when the route is safe.

2.4.4

　　If it is not safe outside of the area where O5 is located, the troops responsible for the evacuation mission should build defenses near the O5 area and continue the evacuation mission after waiting for the surrounding areas to be safe.

2.4.5

　　When the evacuation mission is in progress, the evacuation task should be the highest priority for other tasks in the site. During this mission, site should prioritize O5's safety.

3.Appendix

3.1

    While O5s are not allowed to interact with SCPs, O5s are allowed to supervise testing runs through remote ways.

3.2

    O5s are not allowed to supervise testing on Cognitohazard SCPs even through remote ways.

3.3

    In the event that an O5 has been taken hostage on-site, the other O5s on site are to be evacuated immediately. If there are no other O5s, Regulation 3.4 will take precedence.

3.4

    In the event of an O5 kidnapping, all efforts are to be made to organize a rescue, but all actions are to be given the highest priority to ensure the safety of the O5. All rescue plans that could jeopardize O5 safety are to be immediately denied.
